

## Butterfly Finger Puppet

A butterfly has two pairs of big bright wings. Wings help butterflies to hide from predators by camouflaging themselves within their habitat and help them to keep warm.

River & Rowing  
Museum  
Henley on Thames

1. Colour in the wings and cut them out.
2. Colour in the body and cut it out.
3. Roll the body into a tube and glue the end.
4. Colour in and cut out your butterfly's head. Stick it onto the body.
5. Glue the butterfly's wings onto its body.
6. You can add antenna which help butterflies smell and balance.
