

Wind in the Willows Paper Helicopter

To make your own paper helicopter:

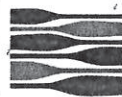

Cut out the template on the right, cutting only **SOLID** lines

Then fold the paper over at dashed lines

IMPORTANT: Make sure that Rat goes backward and Mr. Toad forward, or that Mr. Toad goes backward and Rat goes forward. They cannot be folded the same way.

Use a paper clip or tape to put the bottom folds together

Then hold your helicopter as high as you can, and let go to watch it fly!
