

# The River & Rowing Raft challenge:

#River&RowingRafts

**Can you create a raft that can float on water?**

We are challenging you to get thinking and get making! Using any material you can find, see if you can make a raft that will float happily on water.

You may want to make a raft from sticks and string, an empty food carton, plastic bags, corks, or lolly sticks – or whatever it is that you can get your hands on. Use paper or card to add colourful sails and really make it your own.

Your raft can be small or BIG! But please remember that if you are as big as your raft you should not try and sail it on water as this would be dangerous!

Show us your creations by sending pictures of them to River and Rowing Museum on Facebook, Twitter or Instagram using the hashtag #River&RowingRafts
